SUMMARY

Computer Science graduate focused on applied AI and full-stack engineering, with hands-on experience in Python, Dart/Flutter, and Retrieval-Augmented Generation systems. Most interested in problems where retrieval, large language models, and real product constraints meet - particularly Arabic-language systems, where the tooling is still thin. Seeking a Software or AI Engineer role on a team that ships to real users.

EDUCATION

Bachelor's Degree in Computer Science

2026

Prince Sattam bin Abdulaziz University

EXPERIENCE

Cooperative Training - EPMO (Enterprise Project Management Office)

Jun 2026 - Aug 2026

TAHAKOM - Saudi Technology and Security Comprehensive Control Company, Riyadh

- Automated recurring project reporting workflows using Python and Power Automate, consolidating and validating data from multiple sources and cutting 4 hours of manual reporting work per week.
- Built and maintained a Power BI dashboard tracking project performance, timelines, and deliverables, replacing 100% of the previous manual reporting cycle.
- Supported the technical team on digital tooling, joining requirements meetings and resolving reporting issues.
- Prepared project reports and documentation supporting data-driven decisions and stakeholder communication.

PROJECTS

PresenSee - Smart Attendance Tracking System | Graduation Project

2026

- Built a cross-platform attendance app in Flutter confirming trainee identity through facial recognition combined with GPS location validation before a check-in is accepted.
- Implemented face verification using the MLFaceNet model, with Firebase handling authentication and real-time data synchronization.
- Designed supervisor dashboards providing real-time attendance analytics and automated reporting.
- Eliminated proxy check-ins and replaced manual tracking with automated real-time reporting.

Bilingual RAG Chatbot - PSAU Student Assistant | [Repository](#)

2026

- Co-built, in a team of 4, an Arabic and English assistant answering student questions from a curated knowledge base of 80 university documents covering admissions, policies, study plans, and the academic calendar.
- Implemented hybrid retrieval combining BM25 keyword search with multilingual dense embeddings indexed in FAISS, fused through Reciprocal Rank Fusion, reaching 100% Recall@3 in both languages so the model always receives the correct source document.
- Engineered Arabic query normalization and a bilingual academic glossary, lifting Arabic retrieval accuracy from 0.762 to 0.857 MRR over the keyword-only baseline.
- Grounded generation in Llama 3.3 70B via the Groq API under a strict system prompt restricting answers to retrieved context, preventing hallucination and returning cited answers in under 1 second.
- Python, Streamlit, FAISS, sentence-transformers, rank_bm25, Groq API.

Innovation & Entrepreneurship Club Platform - King Saud University | [iecksu.com](#)

2025 - Present

- Led technical development of the official platform for the Innovation and Entrepreneurship Club at King Saud University - live and in active production use.
- Designed and built the complete platform in Dart and Flutter Web, delivering a responsive mobile-first experience across phone, tablet, and desktop.
- Shipped features for event and workshop registration, club news, and entrepreneurship resources.

CERTIFICATIONS

AWS AI Practitioner Program - Saudi Digital Academy

2026

Delivered in partnership with AWS. AI fundamentals, generative AI, ML basics, AWS AI services, and responsible AI practices.

Raspberry Pi Training Program - Tuwaiq Academy

2025

Practical training in Raspberry Pi fundamentals, hardware integration, embedded systems, and automation workflows.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, Dart, C++, SQL

AI & Machine Learning: Retrieval-Augmented Generation (RAG), Prompt Engineering, FAISS, sentence-transformers, BM25, LLM APIs (Groq, OpenAI), NLP, Supervised Learning, Model Evaluation

Frameworks & Development: Flutter, Flutter Web, Streamlit, Full-Stack Development, REST API Development, Responsive Web Design, Software Testing

Databases & Tools: SQL Databases, Firebase (Firestore), Git, GitHub, Power BI, Power Automate

Spoken Languages: Arabic (native), English (professional)

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Project Coordination, Leadership, Adaptability
